

Lake Roland Nature Council Guidelines for Memorial Recycling Station Selection/Installation

These guidelines are intended to provide a process for accepting and placing Memorial Recycling Stations in Lake Roland.

General Guidelines:

Memorial recycling stations for placement in Lake Roland will be purchased by the Lake Roland Nature Council once the recycling station donation of (\$3,750.00) is received by the Nature Council.

The above cost (\$3,750.00) includes purchase, shipping, installation and plaque, and general maintenance of the recycling station.

Standards for memorial recycling stations in Lake Roland consist of the one black metal style recycling station described below:

- Style: Midtown dual recycle/litter receptacle with door.
- Material: Steel and a durable powder coated black finish.
- Plaque: Sand Cast Bronze with plaque tray 10" x 5"
- The lettering is sand cast and raised from the brown leather background. Bronze lettering in Palatino font, maximum 50 characters, no more than 4 lines.

The Lake Roland Nature Council, in consultation with the donator, will determine the appropriate location for the recycling station. Recycling station locations are maintained on the Lake Roland Memorial Recycling Station location map.

Recycling stations will be installed on a concrete pad in close proximity to a pedestrian walkway.

Going forward maintenance will be the responsibility of the Lake Roland Nature Council.

Memorial recycling stations are received as gifts to Lake Roland, and once received become the property of Lake Roland. If a memorial recycling station must be relocated, the Lake Roland Nature Council will identify an appropriate new location for the recycling station, in consultation with the original donor.
